

## Table of Contents

Section	Title	Author
	Introduction to the Collection of Expert Reports Compiled for the WHP Programme	T.Joyce
<b>1</b>	<b>Calibration and Standards</b>	
	Standards and Laboratory Calibration	P. M. Saunders
	Chlorofluorocarbons, <sup>3</sup> He-Tritium and Small Volume Radiocarbon	J. Bullister
<b>2</b>	<b>Methods for Water Sampling</b>	
	<i>Small Volume</i>	
	Salinity Measurements	M. C. Stalcup
	Measuring Helium Isotopes and Tritium in Seawater Samples	W. J. Jenkins
	CFC Data Processing Quality Control Steps	F. A. Van Woy and P. K. Salameh
*	A Suggested Protocol for Continuous Flow Automated Analysis of Seawater Nutrients	L. I. Gordon, J. C. Jennings, Jr., A. A. Ross, and J. M. Krest
	Dissolved Oxygen	C. H. Culberson
*	Determination of Dissolved Oxygen in Sea Water by Winkler Titration	A. Dickson
*	Measuring <sup>14</sup> C in Seawater ΣCO <sub>2</sub> by Accelerator Mass Spectrometry	A. P. McNichol and G. A. Jones
	<i>Large Volume</i>	
	Large Volume Sampling	R. Key
	Radiocarbon	R. Key
	Collection of <sup>85</sup> Kr and <sup>39</sup> Ar Samples	W. Smethie, Jr.

Section	Title	Author
<b>3</b>	<b>Underway Measurements</b>	
	WHP Subgroup on Underway Measurements	W. Zenk
	Acoustic Doppler Current Profiling Measurements and Navigation	E. Firing
	Near Surface Temperature, Salinity, and Bathymetry Measurements	T. J. Müller and H. W. Schenke
	XBT Measurements	A. Sy
	Meteorological Measurements from WOCE Research Ships	P. K. Taylor and R. Weller
<b>4</b>	<b>CTD Methods</b>	
	Introduction to Conductivity-Temperature-Depth Methods	T. Joyce
*	CTD Oxygen Calibration Procedure	R. Millard, Jr.
*	Improving NBIS MK IIIB Measurements	T. J. Müller, J. Holfort, F. Delahoyde, and R. Williams
	Calculation of Physical Properties of Seawater	R. Millard and N. Fofonoff

\* Denotes new or revised sections ready for distribution in November 1994.
